Definitions:																	
Other ducks - all other species of ducks not listed, mostly divers and some coots..																	
Bird Total is the total number of waterfowl harvested																	
Average - this is the average number of waterfowl per hunter per day																	
# of days bag checked - this is the number of days during the season a bag check was conducted. This is a variable will have an affect the number of ducks reported. 18 days in 2010-11 versus 28 days in 2011-12																	
Percentage of harvest (by species) - this is the number of ducks of that species divided by total waterfowl. This shows a distribution of harvest but may not reflect bird census.																	
an example, there may be way more Shovelers actually at the ponds than 26% of the total but many hunters chose not to shoot them because they aren't as good to eat.
